

PROFILE

Six years professional experience architecting and developing award winning user interfaces for internationally recognized brands. Fluent in a variety of programming languages, design patterns, and frameworks for both web, mobile, and desktop applications.

EXPERIENCE

Factory Design Labs

Lead User Interface Developer

April 2008 - Present

Team lead for developing complex mobile and web based applications. Responsible for architecting, optimizing, and debugging framework level code to ensure operation, quality, and performance. Acted as mentor for the team on technologies, best practices, and innovations.

Factory Design Labs

Senior User Interface Developer

February 2007 - April 2008

Developed rich, engaging user interfaces using Flash and HTML based technologies. Architected, developed, and optimized custom code frameworks and components for use on client projects.

Rocky Mountain College of Art + Design

Instructor

January 2008 - May 2008

Instructed a class of graduate students on interactive website development using Adobe Flash. Curriculum focused on application mechanics, animation, and an introduction to programming with Actionscript.

Wirestone

Interactive Designer/Flash Developer

August 2003 - January 2007

Designed and developed interactive media and print publications with an emphasis on animation and user experience. Work included web sites, interactive maps, banners, and interactive product demonstrations.
